## Eco Friendly Crop Boosters

At Eco Friendly Crop Boosters, we are committed to delivering high-quality, science-driven agricultural solutions that support healthier crops and sustainable farming. Our products are developed using advanced bio-technology and enriched with marine minerals, natural extracts, and organic compounds to ensure superior plant growth and soil health.

# HIGHERALS – Seaweed Extract

## INTRODUCTION

This product is developed using advanced biotechnology from high-quality seaweed extract for agricultural use. The formulation contains seaweed polysaccharides, naturally chelated minerals, proteins, lipids, hormones and pigments that support plant growth, root development, shoot formation and flowering.

## BENEFITS

1. Enhances overall plant growth and yield by 20% to 30%.
2. Increases availability and uptake of essential nutrients from the soil.
3. Improves the overall nutrient profile and crop productivity.
4. Helps plants tolerate stress such as drought, salinity and extreme temperatures.
5. Promotes water retention and strengthens cellular structure.
6. Improves photosynthesis efficiency.
7. Stimulates root development and improves root system activity.
8. Bioactive compounds strengthen the plant's natural defense system.
9. Boosts microbial activity in soil, improving fertility and structure.

## INGREDIENTS

Red Seaweed, Brown Seaweed, Green Seaweed.

## DOSAGE

Foliar Spray : 1 to 2 L per acre; 5–10 ml per liter of water.

Seed Germination : 5 ml per liter of water.

Stem Treatment : 30 ml per tree for perennial crops.

Drenching : 1 to 2 L per acre.

## USED FOR

All types of **vegetable crops, perennial crops and trees.**

# AMINO+ – Fish Amino Acid

## INTRODUCTION

This product is formulated using advanced biotechnology and contains fish-derived amino acids that promote plant health and increase crop yield.

## BENEFITS

1. Provides essential nutrients required for plant growth.
2. Amino acids act as building blocks for proteins.
3. Improves soil structure and microbial activity.
4. Helps plants withstand stress such as drought, heat and diseases.
5. Enhances chlorophyll production for efficient photosynthesis.
6. Increases yield and improves quality.
7. Enhances growth and yield by 20% to 30%.
8. Improves nutrient and water absorption.

## INGREDIENTS

Fish, Shrimp, Prawn, Crab.

## DOSAGE

Foliar Spray : 1 to 2 L per acre, 5–10 ml per liter of water.

Drenching : 1 to 2 L per acre.

## USED FOR

All vegetable **crops**, **perennial crops** and **trees**.

# HUMIC+ – Humic Acid Extract

## INTRODUCTION

This product is developed from premium-quality compost to provide a concentrated humic acid formulation.

## BENEFITS

1. Enhances growth and yield by 20% to 30%.
2. Improves nutrient uptake.
3. Strengthens plant disease resistance.
4. Improves soil water retention.
5. Stimulates root growth.
6. Enhances nutrient and water absorption.
7. Improves plant defense.
8. Boosts soil microbial activity.

## INGREDIENTS

Vermicompost

## DOSAGE

Foliar Spray : 1 to 2 L per acre; 5–10 ml per liter of water.

Drenching : 1 to 2 L per acre.

## USED FOR

All vegetable **crops, perennial crops and trees.**

# ARROW – Pest Repellent

## INTRODUCTION

This product is an oil-based formulation made from natural pest-repellent compounds extracted from medicinal plants and blended with neem oil, karanja oil and essential oils.

## BENEFITS

1. Promotes plant health.
2. Free from harmful synthetic chemicals.
3. Helps plants resist pests.
4. Supplies essential nutrients.
5. Leaves no harmful residues.
6. Supports beneficial insects and pollinators.

## INGREDIENTS

Neem Oil, Karanja Oil, Medicinal Plant Extracts, Essential Oils.

## DOSAGE

Foliar Spray: 1 to 2 L per acre; 5–10 ml per liter of water.

Drenching: 1 to 2 L per acre.

## USED FOR

All vegetable crops, perennial crops and trees.

# GOLD GRANULES – Organic Granules

## INTRODUCTION

This product is made using compost, brown seaweed and wood ash to enhance soil aeration, nutrient release and water retention.

## BENEFITS

1. Enhances soil structure.
2. Increases organic matter.
3. Supplies nutrients and minerals.
4. Slow nutrient release.
5. Reduces nutrient leaching.
6. Improves resistance to pests.
7. Supports soil biodiversity.
8. Maintains soil pH balance.

## INGREDIENTS

Compost, Brown Seaweeds, Wood Ash.

## DOSAGE

Soil Application: 100–200 kg per acre.

100 grams per tree.

10–20 grams per plant.

## USED FOR

All vegetable **crops**, **perennial crops** and **trees**.

# GOLD GEL – Seaweed Gel

## INTRODUCTION

This product is produced from brown seaweeds containing natural plant growth hormones and alginates.

## BENEFITS

1. Contains natural hormones.
2. Enriches soil with nutrients.
3. Helps tolerate drought and stress.
4. Boosts crop yield.
5. Enhances disease resistance.
6. Improves germination.
7. High water-holding capacity.
8. Boosts soil microbial activity.

## INGREDIENTS

Brown Seaweed.

## DOSAGE

Soil Application: 10–20 kg per acre.

100 grams per tree.

10 ml per liter per plant.

## USED FOR

All vegetable **crops**, **perennial crops** and **trees**.
